## The Client

Trimble recognise the importance of engagement and collaboration with industry to maintain the position of Tekla Structures as a best in class structural design tool. The Structural Drawing Office provides confidential consultancy services directly to Trimble, as well as providing industry with bespoke and best in class training in Tekla Structures.

## The Project

The Structural Drawing Office provides a confidential consultancy service to Trimble, information and stakeholders vary from project to project, but the clarity of the professional advice needs to be consistent. Sometimes the topic is centered around validation, development or just simply thinking outside of the box.

## The Client Said

Richard Fletcher, Managing Director for Trimble UK; *“Ciaran provides clear and concise expertise in a structured format to various stakeholders within our organisation, supporting Trimble to meet the needs of our clients in the most effective way possible.”*

*“Through the partnership between Trimble and The Structural Drawing Office, as our Authorised Training Provider for Tekla Structures, industries such as petrochemical and offshore Oil & Gas are better equipped than ever before for the digital future”*
